The date the Fund started

24 May 2011

### What are the risks of investing?

The risk indicator is rated from **1 (low) to 7 (high)**. The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 years to 30 June 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

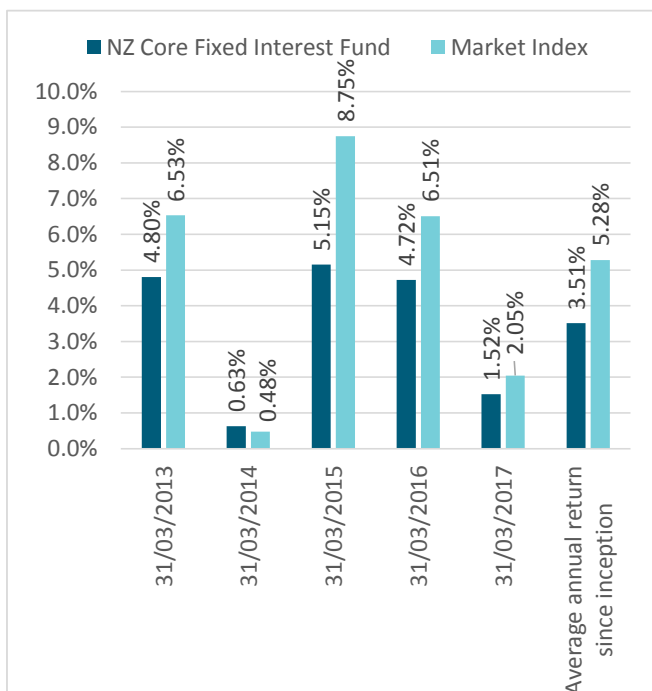

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

## How has the Fund performed?

	Average over past 5 years	Past Year
<b>Annual Return<sup>1</sup></b> (after deductions for charges and tax)	<b>3.09%</b>	<b>1.25%</b>
<b>Annual Return<sup>1</sup></b> (after deductions for charges but before tax)	<b>4.33%</b>	<b>1.74%</b>
<b>Market index annual return<sup>1</sup></b> (reflects no deduction for charges and tax)	<b>4.44%</b>	<b>1.58%</b>

The market index annual return is based on the weighted average return of the market indices used to measure performance of the underlying fund. In this case the Market Index is 50:50 weighted average of the S&P/NZX Government Bond Index and S&P/NZX A Grade Corporate Bond total return Index. Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## Annual Return Graph<sup>2</sup>

This shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the annualised annual return since the fund started, up to 30 June 17. Market Index Returns do not include any tax, expenses or charges.

**Important:** This does not tell you how the Fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Fund are charged fund charges. In the year to 30 June 2016 these were as follows:

	% of net asset value
<b>Total fund charges (Inc. GST)*</b>	<b>0.75%</b>
Which are made up of:	
<b>Total management and administration</b>	<b>0.75%</b>
Including-	
Manager's basic fee	0.51%
Other management and administration charges <sup>3</sup>	0.24%
<b>Total Performance-based fees</b>	<b>0.00%</b>

*\* It is expected that fund charges for the year to 30 June 2017 will be different from the fees presented in the table above due to changes that have been made to the fee structure for the Fund. The PDS sets out an estimate of the fund charges based on the new fee structure and we suggest this will provide you with a more accurate indication of the likely fund charges for the year to 30 June 2017, than the actual charges for the year to 30 June 2016 presented above.*

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS and Other Material Information Document (OMI) for more information about fees.

## Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

## Description of this fund

The Fund is designed to generate quarterly income from a diversified portfolio of Australasian listed equities that pay sustainable and growing dividend yields (the amount a company pays out in dividends each year relative to its share price) as well as holding cash and fixed interest securities.

**Investment Objective:** The performance objective of the Fund is to generate a higher yield than the New Zealand and Australian markets.

**Benchmark:** 60% S&P/ASX Industrials Index and 40% S&P/NZX Portfolio Index.

**Total value of the Fund (NZD)**

\$ 49,238,994

**The date the Fund started**

1 November 2011

## What are the risks of investing?

A combination of actual Fund returns and market index returns have been used to determine the risk indicator for the Harbour Australasian Equity Income Fund (inception 1 November 2011), as the Fund has not been operational for the required 5 years. The risk indicator may therefore provide a less reliable indicator of potential future volatility of this Fund.

The risk indicator is rated from **1 (low) to 7 (high)**. The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 years to 30 June 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in the Fund.

## How has the Fund performed?

	Average over past 5 years	Past Year
<b>Annual Return<sup>1</sup></b> (after deductions for charges and tax)	<b>14.33%</b>	<b>6.59%</b>
<b>Annual Return<sup>1</sup></b> (after deductions for charges but before tax)	<b>16.15%</b>	<b>7.72%</b>
<b>Market index annual return<sup>1</sup></b> (reflects no deduction for charges and tax)	<b>16.48%</b>	<b>13.94%</b>

The market index annual return is based on the weighted average return of the market indices used to measure performance of the underlying fund. In this case the Market Index is 60% S&P/ASX industrials Index and 40% S&P/NZX portfolio Index. Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## Annual Return Graph<sup>2</sup>

This shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the annualised annual return since the fund started, up to 30 June 17. Market Index Returns do not include any tax, expenses or charges.

**Important:** This does not tell you how the Fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Fund are charged fund charges. In the year to 30 June 2016 these were as follows:

	% of net asset value
<b>Total fund charges (Inc. GST)*</b>	<b>1.11%</b>
Which are made up of:	
<b>Total management and administration</b>	<b>1.11%</b>
Including-	
Manager's basic fee	0.80%
Other management and administration charges <sup>3</sup>	0.31%
<b>Total Performance-based fees</b>	<b>0.00%</b>

*\* It is expected that fund charges for the year to 30 June 2017 will be different from the fees presented in the table above due to changes that have been made to the fee structure for the Fund. The PDS sets out an estimate of the fund charges based on the new fee structure and we suggest this will provide you with a more accurate indication of the likely fund charges for the year to 30 June 2017, than the actual charges for the year to 30 June 2016 presented above.*

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS and Other Material Information Document (OMI) for more information about fees.

## Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Jenny had \$10,000 in the Harbour Australasian Equity Income Fund at the start of the year and did not make any further contributions. At the end of the year, Jenny received a return, after fund charges were deducted, of \$772 (that is 7.72% of her initial \$10,000). This gives Jenny a total return after tax of \$659 for the year.
