Responsible/ethical investing

We employ a strategy of integration and company engagement/voting, meaning our team researches the companies we invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. It helps our Portfolio Manager develop an understanding of each company, and influences not only whether we invest in companies, but also how much. The fund also utilises external managers, who must meaningfully integrate ESG and impact into their processes.

Additional information on screening thresholds and processes are outlined in our [ESG Policy](#) and the fund [Statement of Investment Policy & Objectives \(SIPO\)](#).

About the Fund

A diversified portfolio of Australasian listed equities, designed to generate consistent levels of income with less volatility than other equity funds.

The Fund is designed to provide capital growth over time and produce attractive levels of income too. The objective of the Fund is to generate higher yield than the New Zealand and Australian markets.

The stock picking process for this Fund blends a strong quantitative selection process across Australasia with a quality and fundamental overlay. About the Fund

An actively managed fund designed for investors who want liquidity and a higher return than short-term interest rates would generate at a bank.

Fund purpose

This Fund is designed as a short term, higher liquidity and lower volatility investment option. The objective of the Fund is to outperform the benchmark of the portfolio by 85 basis points per annum over a rolling 3-year period.

Fund benchmark

S&P/NZX Bank Bills 90-Day Index.

Investment approach

This Fund holds liquid money market securities, NZ Government stock, corporate bonds and term deposits. It aims to generate returns in two ways: using Harbour's research-driven process to capture the higher yield that longer term securities can offer, then actively managing liquidity and interest rate exposure so funds are available when investors need them.

Responsible/ethical investing

We employ a strategy of integration and company engagement, meaning our team researches the companies we invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. They also develop an impact thesis for each security, linked to at least one UN SDG. This helps our team develop an understanding of each company, and influences not only whether we invest in companies, but also how much. The fund also utilises external managers, who must meaningfully integrate ESG and impact into their processes. The Impact Committee, made up of internal and external members, provide guidance and oversight on impact issues and SDGs. This fund also includes negative screening to remove companies whose business activities may lead to significant harm. Zero-tolerance exclusions include Adult Entertainment, Alcohol, Controversial Weapons, Gambling, Tobacco, UN Global Compact Violators and Whaling. Companies with exposure to fossil fuels will only be included if they are proven to be rapidly transitioning to renewables.

Additional information on screening thresholds and processes are outlined in our [ESG Policy](#) and the fund [Statement of Investment Policy & Objectives \(SIPO\)](#).

Responsible/ethical investing

We use external manager T. Rowe Price for this fund. T. Rowe Price employ a strategy of integration and company engagement/voting, meaning their team researches the companies they invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. It helps their Portfolio Manager develop an understanding of each company, and influences not only whether they invest in companies, but also how much. We only engage external managers who prove to us that they meaningfully integrate ESG into their investment decision making process. We undertake regular due diligence including independent carbon footprint analysis, and engage regularly with their team on management of ESG issues. Information on screening thresholds and processes are outlined in our ESG Policy and the fund Statement of Investment Policy & Objectives (SIPO).
