About the Fund

An actively managed fund designed for investors who want liquidity and a higher return than short-term interest rates would generate at a bank.

Fund purpose

This Fund is designed as a short term, higher liquidity and lower volatility investment option. The objective of the Fund is to outperform the benchmark of the portfolio by 85 basis points per annum over a rolling 3-year period.

Fund benchmark

S&P/NZX Bank Bills 90-Day Index.

Investment approach

This Fund holds liquid money market securities, NZ Government stock, corporate bonds and term deposits. It aims to generate returns in two ways: using Harbour's research-driven process to capture the higher yield that longer term securities can offer, then actively managing liquidity and interest rate exposure so funds are available when investors need them.

Growth of \$10,000 invested in Fund since inception

Cumulative returns after fees, before tax.

Responsible/ethical investing

We employ a strategy of integration and company engagement, meaning our team researches the companies we invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. It helps our Portfolio Manager develop an understanding of each company, and influences the allocation of capital. This fund also includes negative screening to remove companies whose business activities may lead to significant harm. Zero-tolerance exclusions include the production of tobacco, nuclear explosives, cluster munitions, anti-personnel mines, pornography and controversial firearms. Additional information on screening thresholds and processes are outlined in our [ESG Policy](#) and the fund [Statement of Investment Policy & Objectives \(SIPO\)](#).
