What is the purpose of this update?

This document tells you how the Harbour Long Short Fund has performed and what fees were charged. The document will help you compare the Fund with other funds. Harbour Asset Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Fund is an actively managed, high conviction portfolio investing principally in 'long' and 'short' listed Australasian equities.

The focus is on delivering positive returns through the market cycle by investing in long and short-sold equity positions with no particular attention to an equity benchmark.

The fund is expected to have lower volatility than equity benchmarks.

We can actively allocate investments between Australasian listed equities, fixed interest and cash. The Fund may also use derivatives to hedge currency and equity risk.

Investment Objective: To deliver positive absolute returns through the economic cycle with low volatility and low correlation of returns with equity markets.

Total value of the Fund (NZD)

\$2,531,664

The date the Fund started

3 January 2019

What are the risks of investing?

A combination of actual Fund returns and market index returns have been used to determine the risk indicator for the Harbour Long Short Fund (inception 3 January 2019), as the Fund has not been operational for the required 5 years. The risk indicator may therefore provide a less reliable indicator of potential future volatility of this Fund.

The risk indicator is rated from **1 (low) to 7 (high)**. The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 years to 30 June 2020. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past Year
Annual Return¹ (after deductions for charges and tax)	9.87%
Annual Return¹ (after deductions for charges but before tax)	9.58%
Market index annual return¹ (reflects no deduction for charges and tax)	2.04%

The market index annual return is based on the weighted average return of the market indices used to measure performance of the underlying fund. In this case the Market Index is the 15% S&P NZX50 Index: 15% S&P/ASX 200 Index & 70% S&P/NZX Bank Bills 90-Day Index. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose.

What fees are investors charged?

Investors in the Fund are charged fund charges. This Fund has not been open for a year to 30 June 2019. As such, below are estimates of fees to 30 June 2020:

	% of net asset value
Total fund charges (Inc. GST)	1.90%
Which are made up of:	
Total management and administration	1.90%
Including-	
Manager's basic fee	1.25%
Other management and administration charges ³	0.18%
Total Performance-based fees	0.47%

The fees for this Fund have reduced on 1 July 2020. Please refer to the latest PDS which details these estimated fees and charges to provide you with an indication for the year to 30 June 2021. In addition, the above performance fee is an estimate based on data to 30 June 2020. We estimate a performance fee of 0.47% may be payable for the year ending 31 December 2020. This is subject to change (up or down) depending on relative performance for the remainder of the calendar year for 2020. See OMI for more information on how performance fees are charged.

Annual Return Graph²

This shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the annualised annual return since the Fund started, up to 30 June 20. Market Index returns do not include any tax, expenses or charges.

Important: This does not tell you how the Fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What does the Fund invest in?

This shows the types of assets that the fund invests in.

Actual asset allocation to 30 June 2020. Actual asset allocation will vary from the target asset allocation as market conditions change and if we pursue tactical investment opportunities.

What fees are investors charged *continued* ?

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS and Other Material Information Document OMI for more information about fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Jenny had \$10,000 in the Harbour Long Short Fund at the start of the year and did not make any further contributions. At the end of the year, Jenny received a return, after fund charges were deducted of \$958 (that is 9.58% of her initial \$10,000). This gives Jenny a total return after tax of \$987 for the year.
